

Asphalt reinforcement using HaTelit®

Project: _____

Pavement application:

Roads maintenance new construction

Airports maintenance new construction

Runway Taxiway

Existing Structure

thickness of the wearing course: cm
thickness of the base course: cm
thickness of the bituminous base course: cm
subbase: material: thickness: cm

Crack pattern: longitudinal cracks transversal cracks irregular cracking
Vertical movements: Yes No

Proposed construction (using a standard approach)

Construction over the existing surface possible (without milling)

calculated thickness of the unreinforced overlay:

thickness of the wearing course: cm

thickness of the base course: cm (if necessary)

Existing construction will be milled off:

depth of milling: cm

calculated thickness of the subsequent unreinforced structure:

thickness of the wearing course: cm

thickness of the base course: cm (if necessary)
